

Plan for iteration 3

Summary

In this iteration we will mainly focus on getting the “video export” and sound functionality into the application. We will also continue to work on, and extend, the present functionality as well as look into the “Scene” concept.

Task list

- Create the scripttest-suite
- Extend and repair the unit-tests
- Refactor the MainWindowGUI class and draw out code

Feature list

- Implement the “Export video” usecase
- Implement the “Import sound” usecase
- Look into the Scene concept
- Work on the onionskinning functionality
- Implement a more advanced selection of v4l devices
